SKILLS

- Proficient in Python, HTML/CSS, and JavaScript for web development projects.
- Skilled in FastAPI for building efficient and scalable web applications.
- Familiar with SQL (PostgreSQL) for database management and querying.
- Knowledgeable in JSON for data organization and manipulation.
- Competent in version control using Git and GitHub.
- Experienced in leveraging ChatGPT for natural language processing tasks.

Projects

Interactive Story

Developed an interactive story using Python, featuring item management and dynamic storyline progression. Utilized JSON for organizing and structuring the storyline, allowing for flexible content management. Created an engaging narrative that transports users across various worlds within the storyline.

Canvas API

This API allows assignments and discussions to be submitted to canvas. It also provides routes to retrieve courses and get assignments for a specific course.

Golfy Management Application

Designed and developed a FastAPI application for managing golf player profiles and course data. Implemented features for player name and handicap management, enhancing efficiency in golf course operations. Leveraged SQL (PostgreSQL) for data storage and retrieval, ensuring data integrity and scalability.

EXPERIENCE
