Projects

Pharma-EDU

- Designed to streamline and manage essential pharmacy tasks for pharmacy tech students
- Helps prepare students for post-graduation responsibilities
- Handles Patient, Prescriber, Medication, and Prescription CRUD operations
- Uses AWS S3 for image uploads and storage
- Integrates with a backend database using Postgres for secure data operations
- Ensures accurate record-keeping across all pharmacy workflow aspects
- Adopted by Dixie Technical College for use with Pharmacy Tech students

Towers of Hanoi Game:

- Allows players to move discs between towers using drag-and-drop functionality
- Ensures the rules of the Towers of Hanoi are followed
- Provides feedback when the player wins or makes an invalid move
- Uses React for the implementation of the game
- Utilizes the @dnd-kit/core library for drag-and-drop functionality to move discs between towers
